## SPECIALITY MEDICAL DEVICES

S/N	PRODUCT NAME	DESCRIPTION	SYMBOLIC IMAGE OF THE PRODUCT	PRODUCT CHIEFLY USED BY
1	Anti Embolism Stocking Thigh Length	Useful product to help prevent blood clotting and to improve blood circulation in Deep Vein Thrombosis.		Orthopaedics, Surgeons, Physicians and Pharmacies.
2	Vericose Vein Stocking - Class 1,2, 3	Supports healthy blood circulation and prevents health conditions including venous insufficiency, spider veins and varicose veins.		Orthopaedics, Surgeons, Physicians and Pharmacies.
3	IVF Range of products-All types of media	various types of culture media for cell growth in IVF.		Gynecologists and Infertility Specialist
4	Gastro Feeding Replacement Tubes And PEG Tubes	Endoscopy		Gastroenterologist & Surgeons

5	Easy to clean silicone full face mask	To be used with ICU ventilators or BiPAP/CPAP machines. Comes with autoadjustable frames & fused dual wall soft silicone cushioning for comfort and performance. Double vented and single vented types designed to be used with double and single limb circuits respectively.		ICU
6	Easy to NEB NIV nebuliser full face mask	NIV Full Face Mask with universal Nebulization port Auto Adjustable Frame and a Fused Dual Wall Soft Silicone Cushioning. Double vented and single vented types designed to be used with double and single limb circuits respectively.		ICU
7	NEB HME FILTER	help provide effective protection against various types of particles including bacteria, viruses, and moisture droplets.		Critical care, respiratory care, and anesthesia
8	HOSPICUFF Wrist Restrainer	HospiCuff allows medical procedures to be performed safely by keeping arms or limbs from flailing or interfering with the process.		Various Specialities
9	Hospicuff Ankle Restrainer	HospiCuff allows medical procedures to be performed safely by keeping arms or limbs from flailing or interfering with the process.		Various Specialities
10	NEB HME BANSET	Advanced closed tubing set for ventilators which obviates the need for disconnecting HME when nebulization is needed, optimizes drug delivery and reduces infection significantly.		ICU

11	Abbott Glucometer	Easier & Accurate Glucose testing meter from Abbott.		FOR DIABETES GLUCOSE LEVEL MONITORING. ANY
12	Foley Baloon Catheter High Flow/Regular Flow	High Flow 2 way & High flow 3 way & Regular flow 2 way & 3 way.		Urology
13	All Silicon Foley balloon Catheter 2 way & 3 way	Provided with flow control clamp to ensure proper use of bladder muscles .Self lubricated silicon shaft provides low friction surface to allow trauma free removal. Balloon made from low durometer, highly elastic silicon which provides very good tear strength.		Urology
14	CATHSAFE Foley Balloon Catheterization Kit	Complete solution for the indwelling catheterization processes, Easy to use, store and transport, Increases efficiency for medical practitioners.		Urology
15	Siliconised Endotracheal Tube Cuffed & Plain (Nasal / Oral)	Maintain a patient airway, mechanically ventilate patients. Made from a special non-toxic PVC coated with silicon elastomer which forms a bonded film over this tube and balloon. 100% Phthalate free. Coated with non-stick, self-lubricating Silicon elastomer (Elastosyl) which forms a thin film & reduces trauma significantly & does not stick to the trachea. 100 % more bio-compatible surface to the tube and safer. Excellent seal.		Anesthesia & Critical Care

16	Reinforced Endotracheal Tube Cuffed & plain (Nasal/oral)	Maintain patient airway and mechanically ventilate patients. Made from non-toxic, non-irritant medical grade PVC s Uniform spiral metal-reinforced tube wall to prevent the tube from kinking. Reinforcement supports tube position and verification during X-ray s Accurate and safe positioning ensured by graduation marks and tip-to-tip radiopaque line. High volume / low pressure cuff ensures efficient low pressure cuff seal (For cuffed tubes). Universal 15 mm connector at proximal end s Recommended use of bite block / Guedel airway s E.T.O sterile and pyrogen free. For single patient use.	 <p>Reinforced Endotracheal Tube - Cuffed &amp; Plain</p>	Anesthesia & Critical Care
17	Preformed Endotracheal Tube Cuffed & plain (South & North nasal/oral)	Maintain patient airway and mechanically ventilate patients. Made from non-toxic, non-irritant medical grade PVC. Preformed tubes reduce the risk of kinking and improve access to the operative field. Tube can be temporarily straightened for ease of suctioning. Smooth polished Murphy eye, distal end and tapered balloon end for atraumatic intubation and extubation. Accurate and safe positioning ensured by graduation marks and tip-to-tip radiopaque line. High volume / low pressure cuff ensures efficient low pressure cuff seal (For cuffed tubes) s Universal 15 mm connector at proximal end s E.T.O sterile and pyrogen free. For single patient use.	 <p>Preformed Endotracheal Tube - Cuffed &amp; Plain</p>	Anesthesia & Critical Care

18	Tracheostomy Tube Cuffed & Uncuffed	<p>Maintain patient airway through tracheostomy and mechanically ventilate patients. Made from non-toxic, non-irritant, medical grade clear PVC. Kink resistant, thin-walled, thermo-sensitive tube, softens at body temperature. Lockable obturator with facility to insert guide wires to facilitate intubation using the widely accepted Seldinger guide wire technique. Anatomically designed tube and obturator with extra smooth and curved distal end for atraumatic intubation and extubation. Smooth inside/outside surface for ease in intubation, extubation and suctioning. Kink resistant inflation tube to ensure patient safety during cuff inflation and deflation. Radio opaque line and markings provided to facilitate identification of tube position Universal 15 mm connector at proximal end. E.T.O Sterile and Pyrogen free. For single patient use.</p>		Anesthesia & Critical Care
----	-------------------------------------	--	---	----------------------------

19	Suction Catheter Closed System (24hrs/72hrs)	<p>Maintain ventilation and oxygen therapy while suctioning in mechanically ventilated patients. Minimises the risk of Ventilator Associated Pneumonia (VAP). Made from non-toxic, medical grade PVC s Kit comes with 3 easily replaceable catheters, minimizing the need to replace entire suction system every 24-72 hrs. Catheter with lateral eyes, smooth tip and depth markings for maximum patient comfort. MDI port provides an effective, quick and convenient way of drug delivery. Irrigation port with one way valve allows lavage and irrigation of the suction catheter. On/off valve allows suction catheter tip to be isolated and creates an enclosed cleaning chamber. Transparent connectors and durable sleeve facilitates catheter manipulation and prevents infiltration of blood and sputum. 360° swivel elbow enables rotation for enhanced patient comfort and reduces torque.</p>	 <p>STERIMED</p> <p>Suction Catheter Closed System (24 hrs / 72 hrs) Replaceable Catheter System</p>	Anesthesia & Critical Care
20	Nasopharyngeal Airways	<p>Used to secure and open airways for patients in case of emergencies. Provided with rotatable flange for easy securing and pulling out. Made from soft, non-irritant medical grade PVC s Anatomically designed with smooth round edges, thin wall and kink resistance for maximum patient comfort s E.T.O. sterile &amp; pyrogen free. For single use only.</p>	 <p>STERIMED</p> <p>Nasopharyngeal Airways</p>	Anesthesia & Critical Care

21	Intubating Stylet	Used along with Endotracheal Tube to aid during intubation. Smooth plastic coated with flexible malleable aluminum design, allows the stylet to be easily adapted to any desired shape. Soft distal tip to reduce the possibility of intubation damage. Smooth surface for ease in introduction and removal from ET tube s Clean packed.	 <p>Intubating Stylet</p>	Anesthesia & Critical Care
22	Visionary Bougie Vented	Provides rigidity to endotracheal tubes to facilitate endotracheal intubation s Ultra smooth surface for low friction s Atraumatic angled tip for ease of intubation and to minimise risk of patient trauma s Marking provided along the length to facilitate identification of tube position s Angled tip for ease of intubation s Vented lumen for oxygen feed	 <p>Visionary Bougie Vented</p>	Anesthesia & Critical Care
23	Chest Drainage System/Under Water Sealed Drainage System	Used to remove air (Pneumothorax) or fluid (Pleural Effusion, blood) or pus (empyema) from the intrathorasic space s Made from non-toxic medical grade PVC s Bottle with graduation markings to determine precise drain volume s Clear initial level markings for easy and correct usage s Suction port to connect bottle with suction s Universal connectors and kink-resistant tubings for smooth unrestricted flow s Hangers available for ease of use s Available in 500ml capacity (single chamber), 1000ml capacity (single chamber) and 2000ml (double chamber)	 <p>Chest Drainage System / Under Water Sealed Drainage System</p>	General Surgery

24	Surgical Blade with Handle	Sizes: 10, 11, 12, 15, 20, 21, 22, 23, 24		General Surgery
25	Sterilene Nasogastric Tube / Ryles Tube Silicon Elastomer coated	<p>s Used for nutritional feeding purposes or aspiration of intestinal secretions</p> <p>s Made from non-toxic, medical grade PVC</p> <p>s Enhanced patient safety</p> <p>s Coned distal end with steel balls sealed into the tube to facilitate easy insertion</p> <p>s Four lateral eyes for efficient drainage</p> <p>s Proximal end universal funnel connector</p> <p>s Markings at 50, 60 and 70 cm and radio opaque line for accurate placement</p> <p>s Optional: SMD 601 L available with Luer mount fitting</p> <p>s Ryle's Tube Uncoated also available.</p>	 <p>Sterilene - Nasogastric Tube / Ryle's Tube Silicon Elastomer Coated</p>	Gastroenterologist & Surgeons
26	Manual vacuum Aspiration (MVA Kit)	<p>Used for Manual Aspiration procedure (Medical termination of pregnancy)</p> <p>s Made from medical grade polypropylene</p> <p>s Kit consists of MTP Syringe, Karman Cannula, lubricating oil</p> <p>s The MTP Syringe provides high vacuum suction during abortion procedure</p> <p>s Smooth cannula with rounded tip and smooth eyes for atraumatic cannulation</p> <p>s Available in single valve and double valve syringe</p> <p>s Karman Cannula SMD 800 available separately as well in size 4mm - 12mm.</p>	 <p>Manual Vacuum Aspiration (MVA Kit) Double Valve / Single Valve</p>	Gynecologists and Paediatrics

27	Infant Mucus Extractor	<p>Used for aspiration of secretion from oropharynx in newly born babies</p> <ul style="list-style-type: none"> <li>Made from non-toxic, medical grade PVC</li> <li>Transparent chamber for visual examination of the content</li> <li>Round open tip for atraumatic intubation, and proximal end with funnel connector for easy connection to the suction equipment</li> <li>Optional: available with filter and without filter models</li> </ul>	 <p>The image shows a medical device labeled 'Infant Mucus Extractor'. It consists of a clear, cylindrical plastic chamber with a blue funnel-shaped connector at one end and a green, rounded tip at the other. A clear tube is attached to the side of the chamber. The device is shown against a white background with a 'STERIMED' logo.</p>	Gynecologists and Paediatrics
28	Umbilical Catheter	<p>Used to access the umbilical vessels of pre-mature or newly - born babies</p> <ul style="list-style-type: none"> <li>Made from non-toxic, medical grade PVC</li> <li>Smooth round tip for atraumatic insertion and well-finished surface facilitate smooth passage in the vein</li> <li>Markings at every cm to ascertain depth of insertion, radio opaque line ascertain position during scans</li> <li>Proximal end provided with Luer female connector for easy connection to the I.V. therapy equipment</li> </ul>	 <p>The image shows a medical device labeled 'Umbilical Catheter'. It is a long, thin, clear plastic tube with a blue Luer female connector at one end. The tube has markings along its length and a radio-opaque line. The device is shown against a white background with a 'STERIMED' logo.</p>	Gynecologists and Paediatrics

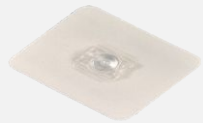

29	Laparoscopic Instruments from Stryker USA and others	<p>Forceps/Scissors/needle holders/Care &amp; cleaning/Imaging systems/Cordless retractor/AHTO Pump/insufflation &amp; Insufflator Accessories/laparoscopic Instrument Trays/pneumoclear/Pneumocare XL/Reusable Electrosurgical Tips/Stryker Flow 2 pump/Suction irrigation tips/1588 AIM + SPY fluorescence technology/1688 advanced imaging modalities (AIM) platform.</p>		Endoscopies & Surgeons
----	--	--	---	------------------------

30	Arthroscopy Equipments & implants Stryker USA & others	System 8, System 8 cordless driver & sabo, System 8 precision, System 8 EZ out, Stryker F1, TPX core 2 console, Auto 62, Blu 62, E62 enzymatic detergent, Smart pump Tourniquet system, Interpulse, Mixevac 3, Flyte, Revolution, Biprep zip skin closure, Biomaterials, cervical fixation, Disc Solutions, Integration and connectivity, interbody devices, Radiofrequency ablation, Spine access and decompression, spine navigation, surgical visualization, thoracolumbar fixation, vertebral body replacement, vertebral compression, Maxillofacial surgical solutions-aesthetics, orthognathic, reconstruction, trauma, Sports medicines for shoulder, hips, knee, resection, fluid management, camera system displays, media management, scopes, Foot and Ankle products for ankle, forefoot, hindfoot and midfoot, Joint replacement Implants for knee, hip, mako, limb salvage, navigation, Trauma and extremitities of hip & pelvis, tibia and femur, foot and ankle, shoulder & elbo, hand & wrist, Upper extremitities elbow, hand & wrist & shoulder products and SHAVER SYSTEM BLADES.		Orthopaedic Surgeons.
31	Neuro Spine ENT Drill System	Blades & burs, Power tools for large bones, medium bone, neuro & spine, small bone, Image guidance Profess navigation system, cranialmap express navigation system, surgical navigation platforms, Essx microdebrider, S2 11 Drive system, S2 mini drill system, Bioresorbable ENT dressings.		Neurosurgeons, Orthopaedics and ENT Specialists.

32	Upper & Lower GI Scopes by Pentax Japan	Reliable HD+ megapixel resoption endoscopes when combined with the EPK-i-series processors, provides high-quality visualization for both routine and advanced procedures at an excellent value.		Endoscopists & Surgeons
33	Medical Air Purification Systems	Application areas include doctor's clinic, hospital, dentist clinic, ICU, Animal/pet care hospital, General waiting area, OT, new born care centre & maternity ward.		Any Speciality
34	Maquet Servo Care products & accessories.	Servo-I ventilators and country kits, Carts & Mounts for waal/shed/bed, manual ventilation accessories, Gas evacuation servo evac 180, Supply O2 Air mixer 961, 962, 965, Nebulizers, Servo humidifiers, Servo filter humidifiers, Suction equipments, Servo gas monitoring, Vaporisers, KION patient monitoring accessories.		ICU
35	LIN 16 1.6M Breathing Circuit Non expandable	User-friendly. Reduced risk of Ventilator Associated Pneumonia (VAP). Single patient use.		ICU

36	Equator Convective Warming Unit Smith Medical	Provides controlled Convective Warming in a compact design. The patented temperature control system ensures the desired therapy setting, while the high air flow distributes the heat across the blanket. Snuggle Warm® Convective Warming Blankets are soft, flexible and durable, and cover a variety of clinical applications, including partial and full body warming for all applications.		ICU
37	Upper Body Blankets Smith Medical	Engineered to deliver improved heat transfer in a wide range of surgical procedures. Bends and conforms while providing uniform temperatures. Offers optimal patient body surface coverage. Allows for fast and easy application.		ICU, OT
38	Lower Body Blankets Smith Medical	Effectively used for patients in the supine, lateral or prone positions. Foot drape minimizes risk of thermal injury to the feet and lower leg area. Continuous adhesive strip secures blanket to the patient. Durable, soft, comfortable, lightweight, radiolucent, latex-free materials.		ICU, OT

39	Bionector Polystyle Mono & Trio	Bionector is a multi-purpose, closed, needle-free connection device. When Bionector is in place, you can infuse, inject sample and change the I.V. tubing without the I.V. circuit to the atmosphere. Bionector's membrane automatically opens the fluid pathway only when a male Luer is disconnected, the membrane automatically seals the fluid pathway. Bionector preserves constantly a closed system. 7 days or 360 connections. Straight fluid pathway. Neutral displacement of fluid. Minimal dead space. Can be used with power injectors (CT-scan). Pressure resistance: 350 psi		ICU , OT
40	Blood & Fluid Warmer Hotline	HOTLINE® Blood and Fluid Warmers deliver normothermic fluid at routine flow rates. The unique triple-lumen tubing design eliminates patient line cool down and delivers warm fluids to your patients. Disposable set up is easy and fast, and requires less priming volume than other routine flow fluid warmers.		ICU, OT

41	L 70 Blood & IV Fluid Warmer set with Inj Pot Smith's medical	<p>HOTLINE Blood and Fluid Warmers are proven in millions of surgeries as providing superior performance, resulting in warmer patients. Smiths Medical offers a full line of disposable administration sets and accessories for use with HOTLINE Blood and Fluid Warmers. Superior performance results in warmer patients.</p> <p>Less maintenance time for nurses and technicians.</p> <p>Lower costs for your hospital.</p>		ICU , OT
42	Lockit Plus Epidural Catheter Smith's medical	<p>The LOCKIT Plus® catheter securement device is a unique epidural catheter fixation device designed to help prevent unwanted catheter migration. The device is designed to deliver uncompromised pain control delivery via the epidural catheter, assisting in providing confidence and peace of mind during post-operative pain management.</p>		ICU, OT
43	ET TUBE FIXATION HOLDER	<p>WrapStrap is fully adjustable to fit children and adults and has standard Xtra cushion materials for patient comfort to reduce skin irritation and chafing. The hook &amp; loop brand hook incorporates added security. The moveable hook &amp; loop brand fasteners square allows for greater flexibility in positioning of the endotracheal tube.</p>		ICU,OT

44	ET TUBE	An <b>endotracheal tube</b> is a flexible plastic <b>tube</b> that is placed through the mouth into the trachea (windpipe) to help a patient breathe. The <b>endotracheal tube</b> is then connected to a ventilator, which delivers oxygen to the lungs. The process of inserting the <b>tube</b> is called <b>endotracheal intubation</b> .	 A photograph showing a clear, flexible endotracheal tube with a blue connector and a silver laryngoscope with a green handle, resting on a blue surface.	ICU,OT
45	HILINE GS 3037 (POLYETHYLENE PRESSURE EXTENSION LINE)	Polyethylene high pressure monitoring extension line. Non-reactive and highly compatible to all the commonly infused fluids. Specially designed spiral type extension line for greater patient comfort and freedom of movement. It expands and contracts gently with patient movement and protects the patient, cannula, infusion equipment from accidental damage. All other features are as that of Hi line. Sterile, individually packed in peel open soft blister pack.	 A photograph of two coiled, clear, spiral-shaped polyethylene extension lines with green connectors at both ends, set against a white background.	ICU, OT
46	PAUL'S Trachael Culture Bottle	Simplifies procedure for sampling of tracheal fluids. Secure, sterile bottle ensures accuracy of culture tests. Vacuum control connector allows easy and quick sampling procedure. Graduated suction tube allows a reading for depth of intubation.	 A photograph of a Paul's Tracheal Culture Bottle, which is a clear plastic bottle with a green cap and a green connector. The bottle is labeled 'STERILE' and 'Paul's Tracheal Culture Bottle'.	ICU, OT

47	T-OXYGENATOR	<p><b>Airways T- Oxygenator</b> helps patient weaning from ventilator .It oxygenates patient on endotracheal tube or tracheostomy tube.It allows doctor to asses about removal of endotracheal tube or TT. For long term Tracheostomy patient with oxygen requirement this device works well. There is suction port by which secretions can be extracted without removal of T from tube, thus preventing infection.</p>		ICU,OT
48	Polymed Polyurimeter Plus Urine Bag with Measured Volume Chamber - 250 ml	<p>Urine collection bag graduated in ml with measured volume meter for accurate measurement of urine. The urine bag is provided with a needle free sampling port for sample collection and to maintain closed system which helps in reducing the chance of Urinary Tract Infection.The urine collection bag is supported with a soft, frosted and kink resistant PVC tubing. Length 100cm. bag comes with a reservoir.</p>		ICU, OT

49	Polymed Novofusion Premium IV Set	<p>The Polymed Novofusion Premium IV Set is designed with "Y" injection port for multiple injections. It comes with a sharp and easy piercing non vented spike. The latex free set is meant for gravity feed only. It has a transparent and flexible drip chamber to visualize the flow rate and has 15 micron fluid filter in drip chamber. The set features a smooth roller clamp which facilitates easy, safe control and adjustment of fluid rates. - It is backed by a soft and kink resistant PVC tubing to ensure uniform flow rate. The length of the tube is 150 cms. The inner diameter of the tube is 3.0 mm and the outer diameter of the tube is 4.1 mm.</p>		ICU,OT
----	-----------------------------------	---	---	--------
